FUND MANAGER COMMENT

February 2019 was characterized by the publication of results that led the way on the market. Indeed, 80% of the STOXX Europe 600 companies published their annual results, 75% of them posted sales growth and 68% net income growth. Nearly 60% of these European companies positively surprised the analysts! After a tough 2018 year and some drastic revisions by the analysts, this trend seems to look like a "soft landing". Nonetheless we will remain very careful on stock selection in order to avoid disappointments!

From a sector point of view, our monthly performance benefited from our exposure and stock selection in the sector of Consumer Services; on the other side, the Industrial stocks penalized the portfolio performance.

Regarding negative contributors, Tarkett (-10.1%) 2018 results disappointed as the company expects a weak dynamic for the current year. The flooring specialist will introduce its new strategic plan in June. Prysmian (-4.2%) is once again penalized by an incident affecting the WesternLink project, but the problem is located on a land-based part of the cable, making it easier and faster to repair than if it had occurred on an underwater section.

As for positive contributors, Barco (+25.7%) keeps going on with a remarkable performance : 2018 results exceeded expectations with a solid 2019 outlook. We keep on reducing gradually its weight in the portfolio, while share price rises. FNAC Darty (+20.4%) warned about its results in January due to the "Gilets Jaunes" demonstration, but still manage to publish 2018 results in line with expectations. The company also confirmed its mid-term objectives.
